SUMMARY

I am a skilled React developer with more than two years of professional experience.

I have a deep understanding of the React ecosystem and a proven track record of successfully delivering high-quality web applications.

I am proficient in developing responsive and interactive user interfaces using React and related technologies such as Redux, React Router, Tailwind CSS and Chakra or many other CSS libraries.

I am good at problem solving and have a passion for coding and I have worked with different teams.

EXPERIENCE

Software Engineer

Baliza.io

July 2022 - Present

- Creating a new react based project from the scratch.
- Developed multiple React-based applications, including a custom CMS with an embedded video playback feature, an application for real-time customer management, and an enterprise-level portal to add alerts and emergencies all connected with google maps.
- Optimized performance of all applications by reducing total load time by 20%, and updating written code to be more memory efficient, improving user-experience and application stability.
- Developed custom UI components to be reusable across all applications, leveraging a library of custom-built React components.
- Code optimization to increase the over all performance of the app, and review of other colleagues code for better understanding and more stability of the app.
- Meetings with clients for the discussion of changes and new features.

Associate Software Developer

Codepilot Technologies Private Limited

February 2020 - January 2021

- Maintaining pre existing projects and updating the components for better usability.
- Adding new features to the react projects.
- Meetings with clients to discuss there needs and make changes according to that.
- Regular meetings with the team for suggestions.
